Mobile Command Post (MCP) established at Montrose Fire Department. Telephone: 570-955-3563

In anticipation of continued media interest, the OSC has requested that one CIC remain onsite during operations, at a minimum.

Satellite phones have been deployed for site teams for communication back to the MCP. All site contact should be through the MCP. (IMT Org. Chart will be forthcoming)

Approximately 6 inches of snow received. Crew got a late start to the MCP, but are continuing to schedule sampling, catch up on documentation, finish Fact Sheet deliveries, etc. One resident requested a CIC appointment for additional information.

The four residents who have received water will be contacted daily to see if they need bottled water or a bulk water delivery. This will continue until a regular schedule can be established.

2 water buffalos were filled and residents received bottled water. No further followup expected at those 2 homes, other than as noted above.

1 water buffalo was filled, but the plumbing needs to be routed away from the contaminated well and back to the water buffalo. ERRS is arranging for a plumbing subcontractor.

1 very small supply tank (not supplied by EPA) was already filled. To set this resident up on a reasonable schedule as mentioned above, an EPA-supplied water buffalo needs to be installed. ERRS is currently gathering subcontractor information for this installation.

Sampling for the week of 1/23/12 is scheduled for 15 homes. 14 homes are scheduled so far for the week of 1/30/12 and a total of 20 are expected to be sampled for that week.

ERRS continues to support site activities including site security, portable toilets, snow removal, etc.
